The Academic Educational Program

In the first year of study, students are provided with a broad base of knowledge of the biopsychosocial, cultural and spiritual influences on health throughout the human life cycle. Students are guided to apply new knowledge in order to assess patient needs and to develop and implement individualized plans of nursing care in a variety of clinical settings.

In the second year, students build on their first year studies and incorporate more advanced nursing knowledge to create plans for comprehensive care in complex nursing situations.

All clinical practice settings have been selected to enhance the academic offerings, to reinforce classroom learning and to facilitate achievement of the desired goal of excellence in nursing practice.

The nursing curriculum is challenging, labor intensive and requires more of a commitment and more time than many other courses of study.

RN-BSN Affiliations

American Public University System
Drexel University
Penn State University- Abington
Walden University
